

Transport and Communication *Developing the 21st Century*

9th International Internet Conference for students aged 14+

► Get the unique experience of an international internet conference! Students from many countries, international experts and the conference team are waiting for you! Join our conference, work and discuss from any internet computer worldwide, at your school, at home or in your internet café!

8 May, 2008

00:00 - 24:00 UTC

(Check what this is in your local time on our website!)

► **Transport and Communication ...**

How did the goods you have used today come to you? What means of transport did you use yesterday? How did you communicate with friends the day before yesterday? And how will all this be within 20 years from now? How can there be sustainable transport and communication?

Let's discuss these questions together. Worldwide. At our next conference!

► **New: Agenda 21 NOW! Resolution.** A good conference has great discussions and ends with the adoption of a resolution. Work with Transport and Communication, be prepared when the conference starts and take part in the decision making. The Agenda 21 NOW! Resolution will be presented to UNESCO and to the public soon after the conference.

► Agenda 21 NOW! is an annual telecommunication project initiative by a team of teachers and students from four schools* in three countries and is also a pilot project of the German UNESCO Associated Schools.

► For further information please visit our website or contact the Agenda 21 NOW! team:
