

Education is Future - What is the Future of Education?

10th International Internet Conference for students aged 14+

► Get the unique experience of an international internet conference! Students from many countries, international experts and the conference team are waiting for you! Join our conference, work and discuss from any internet computer worldwide, at your school, at home or in your internet café!

23 April, 2009

00:00 - 24:00 UTC

(Check what this is in your local time on our website!)

► Education is Future ...

Education is one of our basic needs. We need quality education for a self-determined life – in future even more than today. How will education be within 20 years from now? What should it be like? How would you like it to be? Will there be more education for sustainable development?

Let's discuss these questions together. Worldwide. At our next conference!

► **Again in 2009: The participants work out a Resolution.** A successful conference facilitates enriching discussions and ends with the adoption of a Resolution. Work with "Education is Future", be prepared when the conference starts and take part in the decision making. The Agenda 21 NOW! Resolution will be presented to UNESCO and to the public soon after the conference.

► Agenda 21 NOW! is an annual telecommunication project initiated by a team of teachers and students from currently three schools* in three countries and is also a pilot project of the German UNESCO Associated Schools.

► For further information please visit our website or contact the Agenda 21 NOW! team:
