

Road to 2050 What the world *should* be like, what the world *could* be like ...

16th global Internet Conference on sustainable development for students aged 14+

► Get the unique experience of a global internet conference! Students from many countries, international experts and the conference team are waiting for you! Join our conference, work and discuss from any Internet computer worldwide, at your school, at home or in your Internet café!

19 March, 2015
00:00 - 24:00 UTC

(Check what this is in your local time on our website!)

► Road to 2050 – What the world *should* be like, what the world *could* be like ...
This is a conference about sustainability seen from the result. How could a sustainable world in 2050 look like, when today's 15-year-olds are 50? And how can we achieve that? Moreover, things don't always develop the good way. How can we avoid a wrong direction? Let us discuss different scenarios for 2050. What could be your contribution to a sustainable 2050?

► **Again in 2015: interactive pages and a resolution.** Work with our interactive pages as a tool for your individual conference preparation. Upload your own contributions for all other participants! Work with "Road to 2050 ...", be prepared when the conference starts and take part in the decision-making during the global conference on 19th March. In case there will be an Agenda 21 NOW! Resolution, it will be presented to UNESCO and to the public in May 2015.

► Agenda 21 NOW! is an annual telecommunication project initiated and operated by a team of teachers and students from Humboldt-Gymnasium Trier and Kurt-Tucholsky-School Flensburg, both in Germany, and is also an official project of the German UNESCO Associated Schools.
