Political and demographic change in the early 21st century

17th global Internet Conference on sustainable development for students aged 14+

Get the unique experience of a global Internet conference! Students from many countries, international experts and the conference team are waiting for you! Join our conference, work and discuss from any Internet computer worldwide, at your school, at home or in your Internet café!

17 February, 2016, 17:00 UTC to 18 February, 2016, 18:00 UTC
(Check what this is in your local time on our website!)

Political and demographic change...
This conference is about sustainability. The year 2016 is a time of extraordinary change in many places in the world. How do young people look at these changes? What can we contribute to make the world more sustainable? Let’s read and work on this, let’s talk about this and make an international resolution on this, to let the world know what you(!) think about this.

Interactive pages and a resolution. On our interactive pages you will find a lot of material to get prepared for the conference. And if you wish: Upload your own contributions for all other participants! Very important: Whatever you discuss during the conference, make sure you will be back in the 25th hour, the final hour. This is when all of us will be working on the resolution. Help telling the world what is important for a sustainable future!

Agenda 21 NOW! is an annual telecommunication project initiated and operated by a team of teachers and students from Humboldt-Gymnasium Trier and Kurt-Tucholsky-School Flensburg, both in Germany, and is also an official project of the German UNESCO Associated Schools.
